SUMMARY

Detail-oriented and results-driven professional with six months of internship experience in data analytics, software development, and web development. Proficient in leveraging SQL, Python, and data visualization tools to deliver actionable insights. Skilled in developing dynamic web applications using React.js, Django, and REST APIs, alongside optimizing performance and user engagement. Adept at integrating technical expertise with analytical capabilities to drive impactful, data-driven solutions for diverse business challenges.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Royal Global University 2020 - 2024

Cumulative GPA: 8.11

Prominent Coursework: Database Management System, Software Engineering, Artificial Intelligence, Cryptography, OOPS, Computer Networks, Programming and Data Structures, Algorithms

SKILLS

Technical Skills Front-End Web Development (HTML5, CSS3, Bootstrap 5, JavaScript, DOM Manipulation, jQuery, React.js, Express.js, Node.js), Bash Command Line, Git/GitHub and Version Control
Back-End Web Development (Python, pip, Databases - SQL and MongoDB, Django, Wagtail CMS, REST, APIs, Authentication)
Data Analysis: SQL, Python, Excel (Pivot Table, Power Pivot, Power Query, DAX), Power BI, Tableau, Alteryx, Data Pipelines, Microsoft(Powerpoint and Office)
Programming Tools: C/C++, Java, TensorFlow, ServiceNow, Oracle Database SQL, DevOps, Debugging

Soft Skills Leadership, Critical Thinking, Team Player, Fast Learner, Research skill, MultiTasker

EXPERIENCE

Android App Development Intern

Feb 2023 - Mar 2023

Nutpam Technologies

Kanniyakumari, Tamil Nadu, India

- Challenge: The app required new features and better engagement metrics to grow its user base.
- Action: Designed and implemented new features using Android Studio, leveraging front-end technologies (HTML5, CSS3, JavaScript, React.js) and back-end tools (Python, SQLite, PostgreSQL). Conducted data analysis to inform feature enhancement.
- Result: Achieved a 20% growth in the app's user base and improved user engagement by optimizing UI for responsiveness across devices.

Certified Ethical Hacker Intern

July 2023 - Aug 2023

Forte Webasha Technologies

Chandan Nagar, Kharadi, Pune, India

- Challenge: The client's network faced recurring security breaches and vulnerabilities.
- Action: Conducted penetration testing and risk assessments using tools like Metasploit and Nessus to identify vulnerabilities in both web applications and networks. Collaborated with a team to deploy advanced ethical hacking techniques and data-driven insights.
- Result: Reduced security risks by 35%, minimized breaches by 40%, and strengthened network defenses, ensuring a secure environment for client operations.

- Challenge: The website required improved functionality and user engagement metrics.
- Action: Developed interactive dashboards using React.js, JavaScript, Bootstrap 5, and jQuery. Automated workflows with Python, Django, and REST APIs to streamline backend processes. Enhanced design and functionality for better performance.
- Result: Increased app functionality by 30%, improved user engagement by 50%, and enhanced usability by 45% through optimized workflows and responsive design.

PROJECTS

Drowsiness Detection System.

- Challenge: Real-time driver drowsiness detection was needed to improve road safety.
- Action: Built a deep learning-based system using TensorFlow and Python. Integrated real-time alerts and face recognition for accurate detection in low-light conditions. Deployed the system in a classroom environment for testing.
- Result: Achieved 95% accuracy, enhancing driver safety through reliable, real-time monitoring.

AR Book.

- Challenge: Users required an engaging and efficient way to access educational content.
- Action: Developed a general-purpose augmented reality application using Unity3D and integrated interactive 3D models for improved user comprehension. Optimized the system to reduce load times.
- Result: Boosted user engagement by 30% and reduced load times by 50%, creating an immersive learning experience.

Data Analytics Dashboard.

- Challenge: Manual data analysis processes were time-consuming and prone to errors.
- Action: Designed an interactive dashboard in Power BI, automating data extraction using SQL and Python scripts. Focused on visualizing key performance metrics to facilitate data-driven decision-making.
- Result: Improved efficiency and accuracy of decision-making by providing actionable insights in real time.

EXTRA-CURRICULAR ACTIVITIES

- National Hackathon Finalist: Secured a finalist position in a national-level hackathon with over 500 participants. Contributed as a full-stack developer, creating an AI-based Drowsiness Detection System that utilized deep learning for accurate results even in low-light conditions, along with face recognition and audio alert features. Received recognition for the system's practical applications and innovative design.
- Workshops and Certifications: Attended and earned certifications in diverse domains, including Full Stack Web Development, Machine Learning, Cybersecurity (Cyber Warrior), Google Digital Marketing, Soft Skills Development, Impactful Presentations, ServiceNow Administration and Development, Computer Vision, Data Analysis, and Oracle Database SQL. Applied the knowledge to build projects such as interactive web apps, automation scripts, and data visualization tools, enhancing both technical and soft skills.
- React Projects: Developed and deployed high-fidelity React projects, including a Myntra Clone and a Spotify Clone, featuring responsive designs, dynamic data handling, and reusable components. Improved development efficiency by 30% through modular coding practices. These projects were showcased on GitHub and received positive feedback for their design and functionality.
